Dear, SIr

Sesame Seed Monthly Report

Weather & Crop Overview — India

The Indian monsoon is in its last leg, and while we await an official comment from the weather department on withdrawal of the rains, conditions have already shifted across much of the country, with the dry winter breeze gradually setting in.

The last three weeks have been a mixed bag for the sesame crop. Central India — mainly Uttar Pradesh and Madhya Pradesh — saw excess rainfall in many pockets. These states had planted heavily on the expectation of a dry spell (on the back of the El Niño effect); the dry spells did come, but when it rained, it poured. In other growing areas, rainfall has been adequate and broadly favourable to the crop.
Harvest is a month away across most of the country, and — as is typical with sesame — the trade will be watching closely for any last-minute showers that could affect quality.

Crop Estimate
This is a preliminary, personal estimate at this stage of the season:

Region	**Estimated production**
Rajasthan, Gujarat, MP, UP (combined)	160,000 – 180,000 mt
Smaller growing regions	15,000 – 25,000 mt
Total (approx.)	**175,000 – 205,000 mt**

For perspective, the trade estimate for last winter crop was around 80 – 100,000 mt

India Trade Outlook

India will continue importing this season, but at a slower and more calculated pace, constrained by the limited volumes of hulled sesame currently being shipped. The more disturbing factor is freight — rates from India to the Middle East, EU and USA are giving competing origins a genuine runway to step into India's traditional markets, aided by their own substantial hulling margins. We are currently paying about USD. 200+ per ton to EU while Nigeria is at about USD. 50.00 per ton.

Local demand has also been slow this season and this is matching the current availability of material keeping markets fairly range bound. Starting next month there will be local demand for the festivals and this will create some strength for domestic pricing.

Global Origins

Nigeria — Kwara variety is now being offered, with trades reported to China, India and Turkey in the range of USD 1,150–1,200 pmt CFR, depending on destination freight. Trade sources in Kano suggest the crop may be running roughly 20% below last year, as farmers shift acreage to soybeans. The season is just starting, so supply should be adequate over the coming months, price levels notwithstanding.

Chad — Early reports point to a normal crop.

Sudan — Mixed signals, with low water levels on the Nile affecting multiple crops. Logistics out of Sudan remain effectively off the table for now for most countries, save for neighboring Egypt.

Brazil — A smaller crop to begin with, and much of it already sold forward, leaving little pressure to discount. Trades have been taking place at similar levels — USD 1,140–1,175 pmt, depending on destination. With 7–8 months of selling window ahead, sellers can afford to ride out any near-term volatility.

Pakistan — Natural and hulled sesame prices have moved up by at least USD 50/ton in recent weeks, partly attributed to Pakistan's growing presence in the Korean tender.

China — Inventories close to 400K remain. Local reports of unsold material from the previous crop, mainly Pakistan origin, with elevated FFA levels that are proving difficult to move. Any further developments here could add bullishness globally.

Outlook

- **India:** Cautious import pace; freight remains the key headwind to competitiveness.
- **Nigeria:** New season starting; near-term supply adequate, but a smaller crop is on the radar.
- **Brazil/Pakistan:** Firm-to-higher pricing, sellers not under pressure to move material.
- **China:** Overhang of unsold, lower-quality stock is a wildcard — a swing factor to watch.
- **Overall bias:** Steady to gradually firm trend, but not a complete bull run.

Current price indication on a **FOB basis** for October 2026 shipment are as follows –

Natural Whitish 99/1/1 : USD. 1400.00 pmt
Natural Whitish Sortex, min. 99.95 % purity : USD. 1495.00 pmt

Natural Black 99/1/1 : USD. 1820.00 pmt
Natural Black Sortex, min. 99.95 % purity : USD. 1900.00 pmt
Jet Black Sortex, min. 99.95 % purity : USD. 2295.00 pmt

Hulled Sesame Seeds, Min 99.90 % purity : USD. 1600.00 pmt
Hulled Sesame Seeds, Min, 99.95 % purity : USD. 1715.00 pmt
Hulled Sesame Seeds, Min. 99.97 % purity : USD. 1725.00 pmt
Hulled Sesame Seeds, Min 99.98% purity : USD. 1740.00 pmt

For EU / Taiwan / Korea -

Natural Whitish Sortex, min. 99.95 % purity : USD. 1710.00 pmt

Natural Black Sortex, min. 99.95 % purity : USD. 2280.00 pmt
Jet Black Sortex, min. 99.95 % purity : USD. 2430.00 pmt

Hulled Sesame Seeds, Min, 99.95 % purity : USD. 1845.00 pmt
Hulled Sesame Seeds, Min. 99.97 % purity : USD. 1860.00 pmt
Hulled Sesame Seeds, Min 99.98% purity : USD. 1880.00 pmt

For USA –

Natural Whitish Sortex, min. 99.95 % purity : USD. 1740.00 pmt

Natural Black Sortex, min. 99.95 % purity : USD. 2300.00 pmt
Jet Black Sortex, min. 99.95 % purity : USD. 2450.00 pmt

Hulled Sesame Seeds, Min, 99.95 % purity : USD. 1860.00 pmt
Hulled Sesame Seeds, Min. 99.97 % purity : USD. 1870.00 pmt
Hulled Sesame Seeds, Min 99.98% purity : USD. 1890.00 pmt

We are able to offer these products from our **BRC** certified units.

Packing sizes start from 1 kg units to 1200 kg Jumbo bags.

Please revert your best interest.
