

03.08.2026

Dear,

Good day. We trust you had a good weekend.

India is busy dealing with heavy monsoon in most parts of the country and lack of it in some other parts of the country. This has left us wondering as to what the outcome for the winter sesame crop could eventually be. A large part of the monsoon disturbance seems to be the impact of El Nino as has been predicted. India likely to see below-normal rainfall in second half of monsoon as per several weather reports and in fact, this could be favourable for the sesame crop.

As per data available with the Government as on 31th July, we have moved from 817,000 hectares last year to 927,000 hectares as on date. Since the data for 2025 will not change, it remains to be seen how much the data for the current year can change. An increase of sowing by 13 % percentage while not very significant, cant be ignored either.

The summer crop is largely over and arrivals in the market yard are fairly miniscule. Some material has gone into stock and we will see this re-appear only when the prices are right. This leaves limited supply of raw material for the hullers currently.

When imports from other origins were at lower levels, we had our own domestic availability so we didn't see much sense in imports and now we have small quantities trickling in from those importers who managed to take a call at that time, even if it was just as a hedge.

Another dampener to the trade is the high freight rates which have jumped more than the margins of the sellers and buyers combined for most of our West bound cargoes to EU, USA, Canada etc. This will eventually translate to higher prices from India for sure.

From other origins we don't have any good news to share and Brazil in fact seems to be delaying or deferring several contracts so this could end up being a gap in the supply chain for those buyers relying on this origin. Pakistan, as per reports with us, also seems to have a smaller crop. Tanzania and Mozambique also had smaller crops so there is no panic to sell from that end either. Nigeria new crop levels could be a crucial point to decide market movements in coming days.

Even if we don't see a bull run, surely it seems that the days of low prices and cheap product are gone for now.

Current price indication on a **FOB basis** for Aug – Sept 2026 shipment are as follows –

Natural Whitish 99/1/1	: USD. 1,515.00 pmt
Natural Whitish Sortex, min. 99.95 % purity	: USD. 1,555.00 pmt
Natural Black 99/1/1	: USD. 1,955.00 pmt
Natural Black Sortex, min. 99.95 % purity	: USD. 2,150.00 pmt
Jet Black Sortex, min. 99.95 % purity	: USD. 2,295.00 pmt

Hulled Sesame Seeds, Min 99.90 % purity	: USD. 1,600.00 pmt
Hulled Sesame Seeds, Min, 99.95 % purity	: USD. 1,730.00 pmt
Hulled Sesame Seeds, Min. 99.97 % purity	: USD. 1,745.00 pmt
Hulled Sesame Seeds, Min 99.98% purity	: USD. 1,755.00 pmt

For EU / Taiwan / Korea -

Natural Whitish Sortex, min. 99.95 % purity	: USD. 1,750.00 pmt
Natural Black Sortex, min. 99.95 % purity	: USD. 2,300.00 pmt
Jet Black Sortex, min. 99.95 % purity	: USD. 2,450.00 pmt
Hulled Sesame Seeds, Min, 99.95 % purity	: USD. 1,860.00 pmt
Hulled Sesame Seeds, Min. 99.97 % purity	: USD. 1,870.00 pmt
Hulled Sesame Seeds, Min 99.98% purity	: USD. 1,890.00 pmt

For USA –

Natural Whitish Sortex, min. 99.95 % purity	: USD. 1,770.00 pmt
Natural Black Sortex, min. 99.95 % purity	: USD. 2,320.00 pmt
Jet Black Sortex, min. 99.95 % purity	: USD. 2,470.00 pmt
Hulled Sesame Seeds, Min, 99.95 % purity	: USD. 1,860.00 pmt
Hulled Sesame Seeds, Min. 99.97 % purity	: USD. 1,870.00 pmt
Hulled Sesame Seeds, Min 99.98% purity	: USD. 1,890.00 pmt

We are able to offer these products from our **BRC** certified units.

Packing sizes start from 1 kg units to 1,200 kg Jumbo bags.

Please revert your best interest.

Regards – Sanjiv Sawla
