

05.08.2025

Dear

There is a proverb, “ **Good News Travels Fast, Bad News Travels Faster**”. This, to some extent is what seems to have happened to the Indian sesame market in just the last 2 weeks.

Reports of rain causing severe damage to the crops in the Central Indian states of Madhya Pradesh as well as Uttar Pradesh due to water logging etc have spread far and fast. Coupled with this, some pockets of Rajasthan have also reported crop damage due to excess rainfall. This situation has led to a certain amount of uncertainty on the availability of sesame seeds for the rest of the season. We do not know the extent of damage so far but indeed, there will be a mismatch between the sowing data and what we will eventually harvest. On the flip side, farmers do not usually leave the fields idle so we are also getting news that farmers are considering to replant sesame seed in many of these farms as it is a short crop and the cost of inputs is very low. Sesame would end up replacing even crops like Groundnuts. Hence we now have an unclear situation on what the eventual sesame numbers will be for these regions as there is expected to be a data capture error between original planting and replanting areas. The situation in Gujarat is normal.

The summer crop arrivals have been fairly consistent since the last 2.5 – 3 months so we know we had a decent crop of atleast 125,000 Mt and there is still enough material to go around but clearly the stockists have become active as they feel that there may not be enough to go around and local consumers will buy material at any price eventually. We have seen local prices jump by about USD. 150 - 175.00 per ton from the lower levels for the hulling grade raw materials while it has moved up by about USD. 50 -70 per ton for the natural sortex material. Prices for hulled sesame have also moved up in tandem, but to the extent of about USD. 75 - 100.00 per ton. This may not be reflected completely in the prices indicated below as we also had our Rupee weaken by about 2 – 2.25 % and hence the movement in dollar terms is not as visible. The local price movement has also led to some short covering by exporters as well as demand from overseas from those importers who continues to wait for lower and lower prices.

With new crops in Brazil and Pakistan under shipment and harvest respectively, we were already outpriced in the global markets for natural sesame seed as was evident with the recent Korean Tender results. It is likely that we will now continue our focus on the hulled sesame seed business from our domestic supply as imports are still not in parity. GACC for some Brazil companies was another news in the market and has led to covering of raw material in Brazil and will relieve them of the new crop supply pressures.

We are pleased to indicate firm for Aug – October shipment on a FOB, Mundra / Pipavav basis :-

Natural Whitish 98/2/1 : USD. 1275.00 pmt
Natural Whitish 99/1/1 : USD. 1295.00 pmt
Natural Sortex 99.95% : USD. 1425.00 pmt

Natural Black 99/1/1 : USD. 2450.00 pmt
Natural Black Sortex : USD. 2565.00 pmt
Natural Jet Black Sortex : 2685.00 pmt

Hulled Sesame Seeds, Min. 99.95 % purity : USD. 1525.00 pmt
Hulled Sesame Seeds, Min. 99.97 % purity : USD. 1535.00 pmt

Hulled Sesame Seeds, Min. 99.98 % purity : USD. 1555.00 pmt
Hulled Sesame Seeds, Min. 99.98 % purity : USD. 1645.00 pmt – FOR EU / USA

We ship in all sizes, from Jumbo Bags to 1 kg pouches packed in cartons, as per buyers requirements.

We await your best inquiries, and direct emails enable offers on CFR basis with special prices.

Regards – Sanjiv Sawla
